

AICTE-CPF –Online training on cyber security to create a team of highly skilled professionals in the information security domain

All India Council for Technical Education (AICTE), Ministry of Education and **CyberPeace Foundation** have joined hands to train five lakh students in India on cybersecurity skills in one academic year (2021-22). The project is planned to address the demand for skilled people in the cybersecurity sector. The aim of the programme is also to address the issues that have come up such as cybercrimes, harassment, and abuse with the technological advancements and to build a secure ecosystem of global communities where the internet will become strength for the youth of the country. The coalition will also be researching the problems faced online and developing innovative solutions to address these problems in addition to enabling the youth to expand their knowledge and skills on the Internet.

Technology has added a lot of value to our lives. Even through the past few months, which has affected the world in ways that we couldn't have imagined, technology has given us many opportunities to keep moving forward and stay connected. With these great opportunities, also come unprecedented risks, that many are unaware of. It has been predicted that there will be a deficit of 3.5 million cyber security professionals in the next few years. The cyber security domain has been gaining popularity, however, there is still a gap when it comes to professionals.

To impart skills and help make the upcoming tech professionals industry ready, **AICTE in collaboration with the CyberPeace Foundation (www.cyberpeace.org)**, has undertaken Project eSaksham. The project comprises four levels of training, rated basic to advance, aimed at creating awareness, while building capacities to create a team of highly skilled professionals in the information security domain. The brochure has also been attached for your perusal.

We invite you to be part of Level 1 training which is being conducted over the next few months. The session has been planned for **every Wednesday from 10 AM to 12 PM**. After the session, an online assessment test will be conducted. All students participating in the assessment will be receiving participation certificates.

We are sharing the links for the upcoming sessions this FEBRUARY month. Any student/faculty/staff can register and join **any one session only** as per their convenience on any specified date. Zoom capacity is 10000.
